PRACTICING WAS YESTERDAY, ENJOYMENT IS NOW.

Maximum cross country skiing enjoyment is quite simple: a safe pattern of motion and a uniquely smooth feeling are all you need. There is no talk of hard work and practice. At least there isn't when the ski is equipped with Efficient Forward. This technology fills both beginners and advanced recreational skiers with enthusiasm, thanks to a forgiving kick action and a completely new, carefree skiing experience. And the new construction also saves up to 200 grams in weight. What more could a skier ask for?

TWIN SKIN MAKES THE FLEET COMPLETE

THREE TECHNOLOGIES IN ACTION

TWIN SKIN – A WHOLE NEW LEVEL OF SKIN SKI PERFORMANCE.

Fischer equipment has been setting the standards on the track for years. With the new Twin Skin Race and Twin Skin Pro skis in addition to the Vario Crown and Zero+ models, Fischer rounds off its range of climbing-waxless skis for sporty cross country skiers.

Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair skins ensure you can rely on the kick action, especially in hard or icy conditions. Thanks to the unique Teflon coating of the skins, moisture absorption and subsequent icing is completely minimised.

THREE TECHNOLOGIES IN ACTION.

With Twin Skin, Vario Crown and Zero+ Fischer once again has the perfect solution for all temperature and snow conditions! The diagram shows the optimum areas of use for all three technologies. You can see quite clearly not only the all-round suitability of Vario Crown but also the superior performance of Twin Skin in hard or icy conditions. The Zero+ on the other hand is a special ski for temperatures around the 0°C mark and warmer.

SPEEDMAX: NOTHING FOR SLOW MOVERS.

If the goal is full power then the equipment has to be Speedmax. In the World Cup, the name itself is enough to demand the respect of opponents which is then confirmed by the successful Fischer Classic athletes and their impressive results. And the new, ultralight Speedmax boot – which, with the skis and poles, rounds off the high-end package – knows no mercy either. Together with the RACE CODE seal of quality, Speedmax is the guarantee for a breathtaking World Cup feeling.

FIT THROUGH FUN WHEN EXERCISING.

Enjoy the outdoor experience and do something for your physical fitness. More and more skiers are discovering Nordic Cruising for themselves. And Fischer makes it easy to join in with Vario Crown for even more efficient power transfer and optimised gliding properties in all snow conditions. The broad design of the ski gives you a firm stance and easy handling. Nordic Cruising has never been so much fun!

VARIO CROWN

The newest generation in Crown technology: this cutting pattern which was developed in elaborate tests ensures previously unattained efficiency in motion. In what is perfect interaction with the successful and proven Single and Double Crown units for a direct, powerful kick action, the newly developed Gliding Crown sections with their rounded profile guarantee maximum ease when gliding. The optimum tuning of the climbing and gliding system elements is the secret behind the versatility in use in all snow conditions. Icing up and waxing are a thing of the past for the new Vario Crown.

WIDE BODY TECHNOLOGY

With this special widening in the climbing system zone Fischer gains significant advantages for Nordic Cruisers: more surface area ensures easier climbing and perfect stability. And this stability enables even Nordic Cruisers without technical skills to concentrate fully on enjoying the winter experience.

And this stability enables even Nordic Cruisers without technical skills to concentrate fully on enjoying the winter experience.

YOUR OWN WAY IS THE GOAL.

A sport with more and more followers: step outside your door and enjoy the winter experience without a trail – and you only need 8 to 10cm or more snow. After all, winter is too short and the passion for exercise is too big to wait longer! With specially developed equipment and far-reaching skiing performance, fitness enthusiasts will also get the full benefit of the great outdoors in winter, too.

OFFTRACK CROWN & EASY SKIN

Exclusive climbing system combination for steel edge skis. If Offtrack Crown no longer grips in steep terrain, it's time for Fischer Easy Skin. Just like switching on all-wheel drive mode, Easy Skin can be added/removed easily and quickly as required.

HOW METRES OF CLIMBING CAN BE DOUBLE THE FUN.

Deep in the backcountry, where every climb is followed by an unforeseeable downhill ride, you will find the natural habitat of Easy Skin skiers. The easy attachment of the climbing skin with a combination of adhesion and click-in-place takes the scope of use of this lightweight ski to the limit. With the skin attached you have sufficient grip at your disposal even for steeper climbs. Before the downhill just one hand movement is required to remove the skin and the fun can begin! The extremely break-resistant Backcountry models prove their merits again and again as reliable companions from extended ski treks right up to professional polar expeditions.
